Alvin Monir

Front end Developer | React.js • Next.Js • redux•Tailwind CSS • Node.js • Express • MongoDB • Firebase Auth | Building Responsive, Scalable & Secure Web Applications | RESTful API Expert |

Dhaka, Bangladesh

Summary

I'm a Front end developer
with a strong passion for building modern, user-centric web applications. I specialize in using React, Tailwind CSS, and JavaScript to create responsive and performant user interfaces. On the backend, I work with Node.js and MongoDB to bring full-stack ideas to life.

I chose this path because I love solving real-world problems through code and turning ideas into usable, impactful products. My goal is to contribute to clean, scalable, and accessible digital solutions that make users' lives easier.

Through hands-on projects like ZAPSHIFT, a parcel delivery management system, I've learned how to blend design with functionality and how to work with tools like Firebase, Express.js, GitHub, and Postman.

I'm always learning and improving, currently exploring best practices in full-stack development, user experience design, and performance optimization. Whether in a team or solo, I bring problem-solving, adaptability, and a growth mindset to the table.
